

Cable Internet Broadband

For homeowners who already receive cable television service, their obvious choice for a high-speed broadband Internet connection would be the cable company they already do business with. Most cable companies bundle their services, allowing subscribers to get television, Internet and even phone service together for a reduced price. For this reason, cable Internet broadband is the popular choice for many home-based businesses.

Cable Internet provides a connection that is always on, and doesn't tie up telephone lines like a dial-up service. With the addition of a wireless router, subscribers can create a cable Wi-Fi network in their home or business. Cable does have a few drawbacks though. Speed is dependent upon the number of users utilizing the service simultaneously; and, cable service is subject to outages if a homeowner or construction contractor accidentally breaks the cable line.

Having a reliable, cost-effective and fast Internet broadband connection is essential for any business today. Businesses located in commercial buildings, or home-based businesses without cable television service, must look at the available options for getting an Internet connection to their premises. For example, there are several cable Internet providers in the south Florida communities of Miami, Ft. Lauderdale, West Palm Beach, Boca Raton and the Broward County region. Telephone companies can also provide an Internet connection.

However, there is an alternative option for businesses needing a broadband Internet provider in the cities of Miami, Ft. Lauderdale, West Palm Beach, Boca Raton and in Broward County. Sling Broadband offers a reliable and affordable business Internet connection that is faster than cable or the telephone company's DSL or T1 service. In addition, Sling Broadband has more bandwidth at a better price, plus fast installation and 24/7 support for business customers.

Sling Broadband utilizes the newest available technology to offer better business broadband and Internet telephone service that is cost-effective, secure, scalable and with remarkable reliability. Its innovative network was built from the ground up for the sole purpose of delivering fast and flexible high-bandwidth solutions to businesses.

With a range of service plans, Sling Broadband offers Internet speeds up to 24 Mbps and prices designed to fit the budget of all levels of businesses. Sling's technology provides its customers with dedicated Internet circuits without cable or telephone lines.

If you are looking for business broadband Internet in Broward County, Miami, Ft. Lauderdale, West Palm Beach, or Boca Raton and are thinking about a cable Internet provider, look at all your options before deciding and consider Sling Broadband's dedicated Better Business Broadband service instead.
